Invoice Capturing Solution

capture, process, analyse and post data from incoming invoices directly in your ERP using AI & Machine Learning Technology

Smart data that works with you, not just for you!

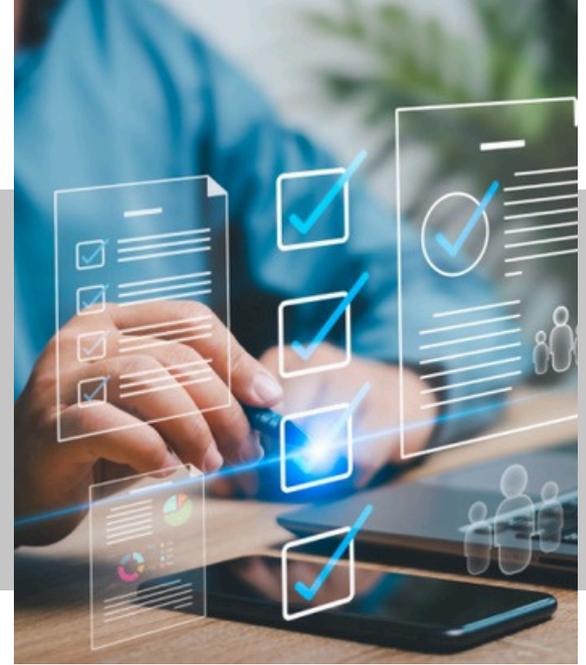

Business Can **Be Simple.**

demstar >

What is invoice smart capture?

It's the process of using AI tools to extract relevant data from incoming invoices, such as invoice no, supplier, date, line items, values, VAT etc, validating & approving the extracted data through an automatic workflow, posting in the ERP app and finally archiving the invoice in a secure e-folder.

Challenges

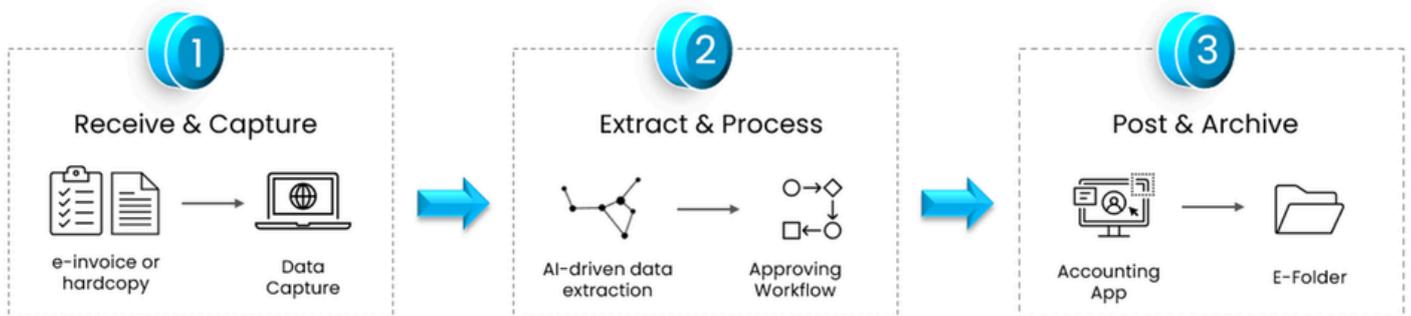

50% of supplier invoices are still provided in hardcopy

5% of invoices are lost either before or after processing

10 min to process each invoice manually

75% of Acc. Departments input invoice data manually in the ERP system

How it works

Benefits

Save Time & Money

Improve accuracy & minimise errors

Increase visibility and audit trail

Turn data into business insights
